NOTICE TO THE HOME LOAN APPLICANT

In connection with your application for a home loan, the lender must disclose to you the score that a consumer reporting agency distributed to users and the lender used in connection with your home loan and the key factors affecting your credit scores.

The credit score is a computer-generated summary calculated at the time of the request and based on information that a consumer reporting agency has on file. The scores are based on data about your credit history and payment patterns. Credit scores are important because they are used to determine what interest rate you may be offered on the mortgage. Credit scores can change over time, depending on your conduct, how your credit history and payment patterns change, and how credit scoring technologies change.

Because the score is based on information in your credit history, it is very important that you review the credit-related information that is being furnished to make sure it is accurate. Credit records may vary from one company to another.

If you have questions about your credit score or the credit information that is furnished to you, contact the consumer reporting agency at the address and telephone number provided with this notice, or contact the lender if the lender developed or generated the credit score. The consumer reporting agency plays no part in the decision to take any action on the loan application and is unable to provide you with specific reasons for the decision on a loan application.

This information will be provided to you once the lender has requested and received credit information from the consumer reporting agencies. If you have questions concerning the terms of the loan, contact the lender.
